

OARRS INTEGRATION

EMPOWERING PRESCRIBERS & PHARMACISTS TO PREVENT OPIATE ABUSE

ProComp CATT EHR Integrates With OARRS

Governor Kasich recently announced an investment of up to \$1.5 million a year to integrate the Ohio Automated Rx Reporting System (OARRS) directly into electronic medical records and pharmacy dispensing systems across the state, allowing instant access for prescribers and pharmacists.

ProComp is pleased to announce that it has committed to including this feature in its **CATT EHR** software. You will now be able to access a patient's controlled substance history directly from your electronic health record without having to login via the OARRS web site.

This convenient and efficient new feature is available to any prescriber office, hospital or clinic utilizing our software. The State of Ohio will cover the annual user fees as part of new effort to encourage greater utilization of OARRS in ongoing efforts to address prescription drug abuse, misuse and overdose.

Integration will also assist you in maintaining compliance with Ohio laws and rules requiring prescribers to query OARRS under certain conditions. To learn more about these requirements, please visit: www.pharmacy.ohio.gov/OARRSreqs.

In order to activate this new feature, you will need to review and submit two documents that are available at www.pharmacy.ohio.gov/integration:

- Integration Request Form
- Terms and Conditions Document

Once both documents have been received and any necessary software upgrades have been completed, the integration feature in your system will be activated for the requested site(s).

Should you have any questions regarding the submission of the documents, please contact the State of Ohio Board of Pharmacy at info@pharmacy.ohio.gov.
